

MBeg+ Control unit MBeg+

The control unit provides the user with tailor-made control of the proven Geutebrück technology. The individually configurable multi-touch color display as well as freely programmable function keys enable clear operator guidance so that the user has all situations under control at all times. The MBeg+ can be discreetly installed in table tops.

- Operator stations in monitoring centers for controlling the Geutebrück software G-Core & G-SIM.

- Simple and functional design.
- Individual function assignment of the keys.
- Convenient operator guidance via multi-touch colour display.
- Power over Ethernet or USB power supply - no power supply required.
- 3-axis joystick with integrated zoom/focus function.
- Jog shuttle for easy navigation through video recordings in combination with G-SIM.
- Possible operation of GeViSoft, G-Core and G-SIM.

Planned feature from Q1/2020:

- Versatile control options thanks to the multitouch display
- Access to cameras, tours and maps
- Processing of alarms
- Thumbnails
- Freely programmable fields

Technical Data

Graphic display	5" Touch screen 800*480 pixels
Interfaces	LAN / Ethernet 10/100 (RJ-45) PoE capable
Power supply	LAN (Power over Ethernet), USB
Current consumption	max. 500mA
Number of programmable keys	16
Number of soft keys Keys	4
Operating temperature	0-50 °C
Type	Desk housing
Housing material	Sheet steel painted to RAL 9011
housing dimensions	Width 382mm Depth 156 mm Height without joystick 68mm
Front panel and keyboard	Plexiglas high gloss with stainless steel keys
Weight	approx. 2 kg
Order no	0.50700
