

# GEUTEBRÜCK

## G-Scope 900 Camera Bundles Only available for order in the online store

### SYSTEMS FOR STATIONARY APPLICATIONS

The G-Scope 900 consists of the Geutebrück Server Station 3000+ G2 with pre-installed **G-Core Lite** software and 9 CamConnect software options already included.

To simplify the quick configuration of standard systems, the G-Scope 900 is also available in two bundles with four or eight cameras.

The server hardware for stationary applications has Geutebrück's usual high quality, performance and proven reliability without compromise. The software is designed for use in smaller projects with standard video security requirements under the highest quality standards and is precisely matched to these applications as a coherent overall system. The result is a G-Scope system of the highest quality and performance, with an outstanding price/performance ratio.

The **G-Scope 900 Camera Bundle 4** contains 2 mini bullet cameras type EWPC-5270 and 2 mini dome cameras type EFD-5260.

The **G-Scope 900 Camera Bundle 8** contains 4 mini bullet cameras type EWPC-5270 and 4 mini dome cameras type EFD-5260.

The G-Scope 900 bundle comes with 12 months warranty. The warranty cannot be extended for this server variation.

#### FIELDS OF APPLICATION

- Small projects with maximum 9 cameras such as post offices, gas stations, warehouses and many others.
- Suitable for higher requirements for higher quality video images.

#### HIGHLIGHTS

- Customized functionality for small CCTV projects.
- Highest hardware quality.
- Mature software technology.
- Very good price-performance ratio.
- Upgrade packages of the G-Core standard version can be booked optionally.
- Also suitable for installation in server cabinets.
- Data protection by making image areas unrecognizable and inserting security features within the image files (e.g. privacy masking, watermarks, etc.).
- Image data can be easily outsourced manually in tamper-proof Geutebrück Format (GBF) as video and audio data.
- Thanks to a tamper-proof image database, the images can be used in court.
- High data security thanks to encrypted data transmission of the video images throughout the network.
- Clearly structured, user-friendly operating concept with user profiles for individual adaptation of the playback interfaces.
- Smooth video display thanks to high-performance systems.
- Time-synchronous playback of multiple camera channels, even from multiple recorders simultaneously.

## FURTHER SPECIFICATIONS

The G-Core Lite version of the G-Scope 900 comes with 12 months of free software updates. This update period can be extended cost-effective per year. There is no upgrade path from the G-Core Lite version to the G-Core standard version. We recommend the optional G-Scope upgrade packages for this system to protect the value of your investment for years to come and to realize the full potential of the product. Each upgrade package provides you with all software updates for 12 months.

For functionally and quantitatively more extensive projects, we recommend a combination of a Geutebrück server station and our G-Core software, supplemented if necessary by G-SIM standard software and options.

For the scaling ranges and available options of the G-Sope 900 system, please refer to the overview table in the [Geutebrück Online Shop](#).

The G-Scope 900 can of course also be used with any other compatible camera.

System Components	
<b>Hardware</b>	3000+ G2 base unit, Intel i3 processor, 256 GB SSD (system), 4 TB HDD (image storage), 8 GB RAM, 12 months warranty
<b>Software</b>	Windows 10, G-Core Lite pre-installed, 9 CamConnect software options, including 12 months free updates
