The product will be available from Q1/2023 Optional module that automatically follows the intruder when he leaves the field of vision of the fixed camera.

- Perimeter protection
- Building monitoring
- Site surveillance
- Critical infrastructure
- Industrial
- Residential

Technical data

Optional module that automatically follows the intruder when he leaves the field of vision of the fixed camera.
The Perimeter+ PTZ positions the camera in the detection point and takes control by following the intruder as he moves about. A video with the alarm is sent to the control centers for additional checks.

Important: Perimeter+ PTZ is an optional feature license for PTZ cameras that can only be used in conjunction with a Perimeter+ ALR license.
